Since 1967, italian doors manufactures...

[Download our product catalogue](#)

...to live and work in beautiful, harmonious and comfortable spaces.

Since 1967, Barausse has specialized in the production of interior doors, which are 100% designed and manufactured in Italy.

Barausse develops and offers furnishing solutions for the purpose of creating a separate space which is both functional and prestigious with a high esthetical value. The result is both a beautiful and comfortable place to live!

Thanks to multiple certifications of our fire rated doors, the ability to design bespoke products and our over twenty years of experience in the contract field, Barausse is able to provide worldwide, a high quality product for luxury hotels. We also provide this same high end standard for public buildings, high rise residential and private homes.

Barausse is a Company born in Veneto, an Italian territory that stands out for its innovation, hard work, efficiency, inventiveness. Venezia, Vicenza, Verona, Padova Treviso, Rovigo and Belluno are proof of a magnitude that has been able become concrete in the field of art and architecture.

Dal 1967 Barausse è specializzata nella produzione di porte per interni, 100% progettate e realizzate in Italia. Barausse sviluppa e propone soluzioni d'arredo funzionali alla separazione degli spazi, di alto prestigio e valore estetico, per creare ambienti dove vivere sia un'esperienza emozionante e confortevole. Forte di numerose certificazioni per porte resistenti al fuoco, della progettazione di prodotti custom, e la ventennale esperienza nel settore contract, Barausse opera nel mondo nella realizzazione di Hotel di lusso, strutture pubbliche, costruzioni residenziali e ville private. Barausse è un'azienda nata nel Veneto, un territorio italiano che si distingue per le sue caratteristiche di innovazione, operosità, efficienza, ingegno. Venezia, Vicenza, Verona, Padova Treviso, Rovigo e Belluno sono la testimonianza di una grandezza che ha saputo divenire concreta anche nel campo dell'arte e dell'architettura.

Barausse Product Care

kit PORTA FACILE

Brevetto Barausse

Per un montaggio rapido e preciso.

Il kit di montaggio "PORTA FACILE" è stato creato per rendere più veloci e precise le operazioni di installazione delle porte anche in assenza di falsotelaio.

Il kit è composto da un sistema di spessori da inserire tra anta e telaio prima della schiumatura per garantire il rispetto delle tolleranze.

Патент фирмы Barausse

Для быстрого и правильного монтажа.

Набор для монтажа "PORTA FACILE" был создан для того, чтобы ускорить процесс установки двери и сделать его более легким и точным даже при отсутствии фальшкороба.

Набор представляет собой систему клинышков-распорок, которые устанавливаются между дверным полотном и коробом для правильного распределения зазоров перед нанесением пенопласта.

Barausse Patent

For fast and precise fitting.

The "PORTA FACILE" fitting kit was created to make leaf installation operations quicker and more precise even when there is no counterframe.

The kit is composed by a system of shims to insert between the door and frame before foaming to guarantee compliance with the tolerances.

Brevet Barausse

Pour un montage rapide et précis.

Le kit de montage "PORTA FACILE" a été conçu pour rendre les opérations d'installation des portes plus rapides et précises, même en l'absence de contrecadre. Le kit contient un système de cales à introduire entre le vantail et le cadre avant l'injection de la mousse pour garantir le respect des tolérances.

Patente Barausse

Para un montaje rápido y preciso.

El kit de montaje "PORTA FACILE" ha sido creado para hacer más rápidas y precisas las operaciones de instalación de las puertas, incluso en ausencia de premarco.

El kit está compuesto por un sistema de suplementos que se colocan entre la hoja y el marco antes del espumado, para garantizar el respeto de las tolerancias.

Patent Barausse

Do szybkiego i dokładnego montażu.

Zestaw montażowy "PORTA FACILE" został stworzony tak, aby ułatwić i usprawnić montaż skrzydeł drzwi oraz uczynić go bardziej dokładnym nawet w przypadku braku ościeżnicy. Zestaw montażowy, składający się z systemu klinów, może być wprowadzony między drzwi a framugę jeszcze przed piankowaniem, co pozwoli na nieprzekroczenie dopuszczalnych odchyłów.

anti-humidity kit

kit anti umidità · kit antihumedad · комплект для влагоизоляции · kit anti-humidité · zestaw przeciw wilgoci

Per prevenire i danni dell'umidità.

L'umidità prodotta tra le mura domestiche in particolari situazioni, ad esempio in bagno o in cucina, può danneggiare la finitura delle porte.

Per evitare che il legno si sfaldi o che si gonfi è consigliato, all'atto dell'installazione, trattare il piede di telaio e coprifili con il prodotto antiumidità studiato per Barausse da SAYERLACK®.

Для предотвращения ущерба, наносимого влажностью.

Влажность, присутствующая в воздухе и появляющаяся на стенах домов, например, в кухнях, туалетах и ванных комнатах, может привести к повреждению облицовки дверей.

Поэтому при монтаже двери для предотвращения набухания и расщепления дерева в процессе эксплуатации, необходимо нанести слой специального состава, разработанного для фирмы Barausse SAYERLACK®.

To prevent damage from humidity.

The humidity produced inside the room in particular situations – in the bathroom or in the kitchen, for example – can damage the finish of doors.

To avoid the wood from flaking or swelling, we suggest to treat the foot of frame and architraves during installation with the anti-humidity kit developed for Barausse by SAYERLACK®.

Pour prévenir les dégâts de l'humidité.

L'humidité présente naturellement dans l'air et celle produite entre les murs domestiques, comme par exemple dans la salle de bains ou dans la cuisine, peut endommager la finition des portes.

Pour éviter que le bois ne s'effrite ou qu'il ne se gonfle il est nécessaire, au moment de l'installation, de traiter le bas du vantail, le cadre et les chambranles avec le produit anti-humidité étudié par SAYERLACK® pour Barausse.

Para prevenir los daños causados por la humedad.

La humedad producida entre las paredes domésticas en particulares situaciones (por ejemplo, en el baño o en la cocina) puede dañar el acabado de las puertas.

Para evitar que la madera se descame o se hinche, en el momento de la instalación es aconsejable tratar la parte inferior de marco y tapajuntas con el producto antihumedad especialmente estudiado por SAYERLACK® para Barausse.

Do ochrony przed wilgocią.

Wilgoć obecna w powietrzu i ścianach, a przede wszystkim w łazience i kuchni może uszkodzić drzwi.

Aby uchronić drewno przed łuszczeniem się i puchnięciem, proponujemy zastosowanie "Kitu Barausse do ochrony przed wilgocią" w trakcie instalacji drzwi przez nałożenie go na nadproże, ościeżnicę oraz pod skrzydła drzwi. Kit Antiumidità został opracowany dla firmy Barausse przez SAYERLACK®.
